Springer Nature and the Cyprus Academic Library Consortium are proud to present:

Author Workshop: Publishing Scientific Research

'Publish or perish' is a popular phrase in the scientific community: Your research can only be recognized if you publish it.

But publishing raises many questions for authors: How do you find the appropriate journal for your research? How do you improve your chances of getting your paper accepted? What is the influence of the Impact Factor and how is it calculated? Open Access vs. traditional publishing: What are the differences and which option suits best for your purpose?

Join our **Author Workshop** and get answers to these questions (and many more). The Author Workshops are made available to you by **Springer** and the **Cyprus Academic Library Consortium** and are free of charge.
