

# Usage Manual

## Creating an Assignment

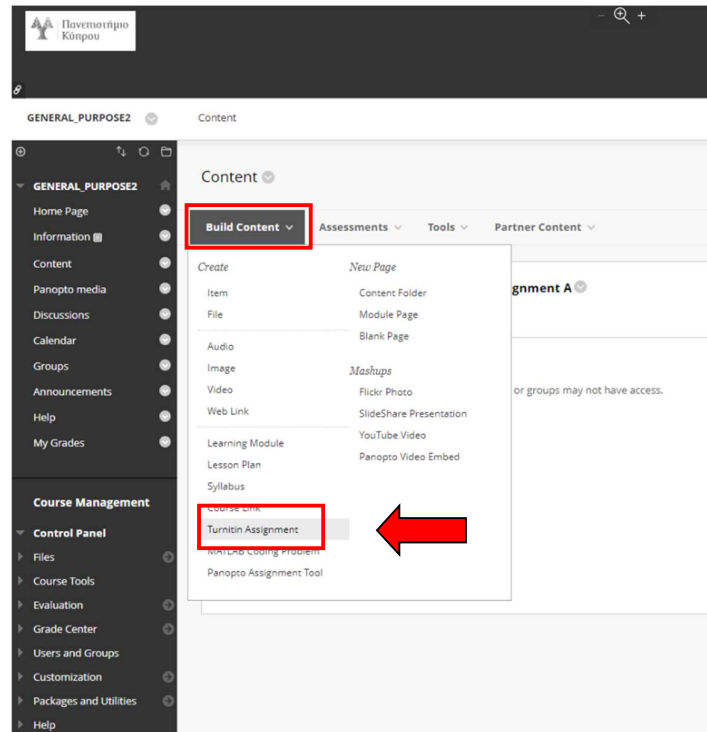

Version 1

To create an assignment using the Original Course View of Blackboard, follow these steps:

1. From the **course** you would like to add the assignment to, navigate to the **Content section**.

2. Once in the content section, select **Build Content**.
3. Select the **Turnitin Assignment** option found in the Create column.

4. Fill out the Turnitin assignment settings to complete the assignment.

The screenshot shows the Turnitin assignment settings form. It includes fields for 'Title', 'Instructions', 'Max Grade', 'Start Date', 'Due Date', and 'Feedback Release Date'. There is also a checkbox for 'Enable PeerMark' and an 'Optional Settings' section. The 'Submit' button is highlighted with a red box and a red arrow pointing to it.

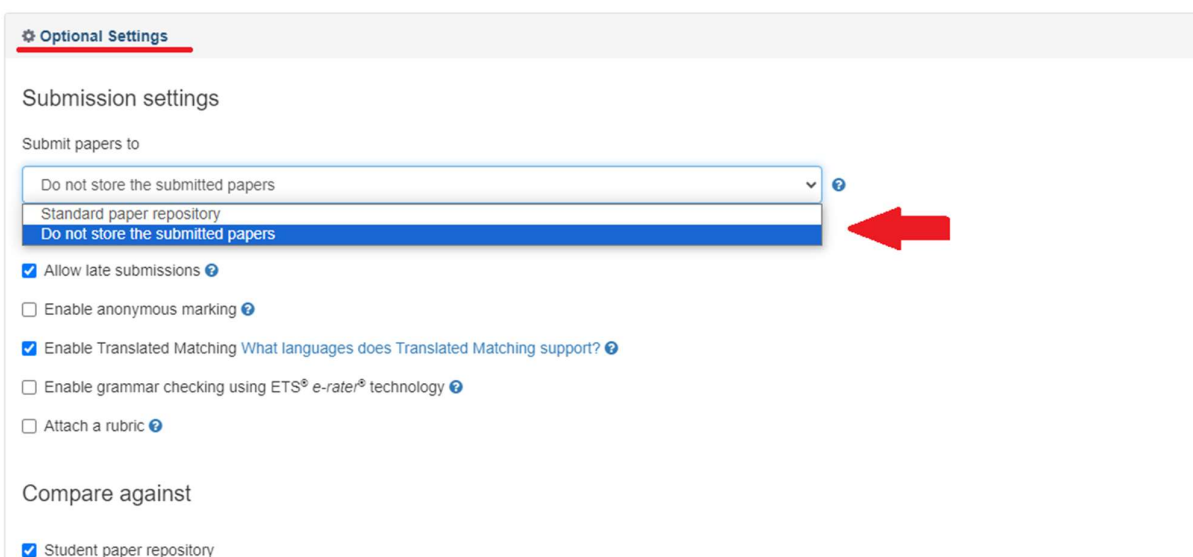

5. In the optional settings option, select Submission paper to:

**- Standard Paper Repository**

Student papers will be checked against other institutions' student submissions.

**- Do not store the submitted papers**

A Similarity Report will still be generated for paper submissions, but your students' papers will not be stored in the Turnitin standard paper repository.

The screenshot shows the 'Optional Settings' page in Turnitin. Under the 'Submission settings' section, the 'Submit papers to' dropdown menu is open, showing three options: 'Do not store the submitted papers', 'Standard paper repository', and 'Do not store the submitted papers'. The second option, 'Do not store the submitted papers', is highlighted in blue. A red arrow points to this option. Below the dropdown, there are several checkboxes: 'Allow late submissions' (checked), 'Enable anonymous marking' (unchecked), 'Enable Translated Matching' (checked), 'Enable grammar checking using ETS® e-rater® technology' (unchecked), and 'Attach a rubric' (unchecked). Under the 'Compare against' section, the 'Student paper repository' checkbox is checked.
